Testing Notes

- This document is entirely fictional and is not a real broker statement.
- It is designed to test PDF parsing, buy/sell extraction, FIFO lot matching, corporate-action handling, and charge allocation.
- For the project demo, assume latest market prices: ALPHA ■140, BETA ■70, GAMMA ■230.
- The ALPHA sell of 80 shares should partially consume the first 100-share FIFO lot.
- The BETA sell of 75 shares should partially consume the 200-share FIFO lot.
- GAMMA's bonus action changes the holding quantity without creating a normal trade entry.
